Summary

Mobile Solution Development Co-op Graduate and a software developer with hands-on experience gained through a growth-oriented internship during bachelor's and post-graduation degree in technology. Recognized by mentors and peers for demonstrating a strong passion for innovation and teamwork while working with a great organization as a java software developer. I'm a self-motivated and high-achieving employee who strongly believes that one only makes significant progress in an organization if everyone in the team is pulling in the same direction over the years, I have built up lots of transferable skills and experiences that match not just this job description but also for the leadership principle you expect your employee to demonstrate in their work. For example, I will always come up with initiative of new ideas for the team I will look for ways to save the business money by being frugal in my approach to tasks and I will challenge team decisions professionally with a view to encouraging people to think outside the box and to strive for continuous improvement and development
